

How to Make My Snowman

By: Parker10A

1. Make a background. The background needs to be #ccffff or the really light blue.
2. Then, make a snowman with the inside color white, the outline size 14, and the outline color black. The bottom snowball needs to be 3 thumb widths in diameter. The middle snowball needs to be two and a half thumb widths, and the top two thumb widths.
3. Make a face on the snowman with tiny circles black, and outline size is 1, but don't draw a nose. The nose needs to be orange, 2 centimeters long, and triangle shaped (the triangle in the shapes box and is in between the eyes and mouth).
4. Make a black top hat with the pencil and put it on the snowman's head. The rectangle on top needs to be 3 fourths of an inch long and the bottom one 1 and a half inches.
5. Fifth, draw arms with three fingers on the middle snowball the color of #663333 and outline size 8. The arms are 3 centimeters long.
6. After that make a red scarf outline 18 under the top snowball. (it looks like a T with the left side longer than the right)
7. Then, put three little pebble sized black circles in the middle snowball. (About two to three millimeters wide and outline size 1).
8. Lastly, put a broom stick (the color of #663333) in the right hand and a snowball the size of a pinkie fingernail in his left.
